

EventForge

The Ultimate Enterprise Event Management Platform Features, Capabilities, and Operations Guide

What Problem Does EventForge Solve?

Traditional event platforms charge **high commission fees (2-8% + flat fees)**, require attendees and staff to download **native check-in apps**, and upcharge for essential features like **badge printing**, **live polls**, and **exhibitor lead capture**.

EventForge changes the paradigm. By offering a fully integrated, zero-commission (aside from Stripe fees) platform, organizations can manage multi-track summits, simple workshops, and hybrid events entirely from their browser.

Platform Features Overview

Ticketing & Registration

Configure multi-tier ticket types (free, paid, donation, group) with custom registration forms, waitlists, and discount codes. Checkout is fully integrated with Stripe.

Agenda & Speakers

Build multi-track schedules with drag-and-drop ease. Manage speaker profiles, room capacities, and session-level RSVPs. Support for hybrid streaming links (Zoom/Teams).

On-Site Operations

Check attendees in using a browser-based QR scanner—no native app required. Design custom badges and

Engagement & Networking

Keep audiences active with live session polling, moderated Q&A boards, chat channels, and 1:1 attendee meeting

queue them to network printers automatically.

scheduling. Built-in gamification drives participation.

Marketing & Automation

Create email campaigns with MJML templates. Trigger automated workflows based on registration or check-ins. Includes an exhibitor portal for lead capture.

Analytics & Platform

Monitor real-time revenue, check-in velocity, and page views. Scale with multi-tenant workspaces, granular API keys, and immutable audit logging.

How To Use EventForge

- 1

Create Your Workspace

Register an account and create your organization workspace. Set your brand colors, default currency, and locale. Invite your team members assigning them specific roles (Admin, Organizer, Staff).
- 2

Configure & Publish Your Event

Define your event details, venue, and dates. Create ticket tiers (e.g., General Admission, VIP) and build custom registration forms. Set up your agenda tracks and add speakers. Once ready, publish your branded event website.
- 3

Sell & Promote

Launch ticket sales through the secure Stripe integration. Use the marketing module to send out customized email campaigns to your audience and configure automation workflows (e.g., "Send reminder 1 day before event").
- 4

Execute On-Site

On the day of the event, staff members log in via their mobile browsers to access the QR Code Scanner. Scan attendee tickets for instant check-in. The system automatically triggers badge print jobs to connected network printers.
- 5

Measure & Optimize

Monitor the live analytics dashboard. Track check-in throughput, session popularity, revenue breakdowns, and email campaign performance. Use these insights to optimize future events.

Competitive Advantage

Feature	EventForge	Traditional Platforms
Commission Fees	0%	2-8% + per-ticket flat fee
Check-In Scanner	Browser-based (PWA)	Requires App Download

Feature	EventForge	Traditional Platforms
Live Engagement (Polls/Q&A)	Built-in	Requires 3rd-party tool (e.g., Slido)
Custom Badge Printing	Included w/ Print Queue	Expensive Add-on
